

## Biofuels Test Centre™

### Testing Services for the North American Biofuels Market

Biofuels are gaining in popularity because they reduce climate-altering greenhouse gas emissions and provide economic opportunities for rural areas. North American biofuels production has grown dramatically in the past few years. It is now poised for even stronger growth in response to higher energy prices, climate change mitigation strategies, and greater awareness. The Saskatchewan Research Council (SRC) key to success in the biofuels market is a high-quality product. The Biofuels Test Centre™ has the capability to test biofuel samples to ensure products meet recognized standards.

### State-of-the-Art Biofuels Testing Available

- The Biofuels Test Centre™ offers a full suite of tests for ethanol and biodiesel producers throughout North America.
- The new, state-of-the-art Biofuels Test Centre™ is conveniently located in Regina, Saskatchewan, Canada.
- The capabilities of the Biofuels Test Centre™ complement the broad range of testing services that SRC has successfully provided to the petroleum industry for more than 20 years.

### **SRC: A Reputation for Rigorous Standards**

- SRC is a member of the Canadian Association for Laboratory Accreditation (CALA) and is accredited for specific tests registered within the Association.
- Capabilities include testing to meet the requirements of the Canadian General Standards Board (CGSB) and the American Society for Testing and Materials (ASTM) utilizing advanced technologies.
- SRC offers full-suite testing or customized packages to meet all CAN/CGSB-3524 and ASTM D-6751 specifications.
- SRC can assist in the validation of inhouse labs to help biodiesel facilities meet BQ-9000 standards.

### **Fast and Efficient Service**

- Turnaround times are important. The Biofuels Test Centre™ strives to provide testing results to meet your schedule.
- Test results are strictly confidential and samples are retained for 30 days.
- Containers are available to make biofuel shipments quick and easy from anywhere in North America.
- Information on pricing, containers and shipping is available on request.

Lubricity by High Frequency Reciprocating Rig (HFRR).

The Saskatchewan Research Council (SRC) offers a broad range of engineering and technical expertise. For a complete list of services, visit our website at [www.src.sk.ca](http://www.src.sk.ca).
