## Environmental Analytical Laboratories Services for Industrial Hygiene and Air Quality

SRC Environmental Analytical Laboratories performs a wide range of testing for industrial hygiene and air quality. Various analytical packages and individual parameters are available to meet the needs of your business.

Industrial hygiene assists with controlling health hazards in the workplace in order to protect worker health and safeguard the community at large. The procedures used to monitor exposure in the workplace and surrounding environment follow National Institute for Occupational Safety and Health or Occupational Safety and Health Administration methods.

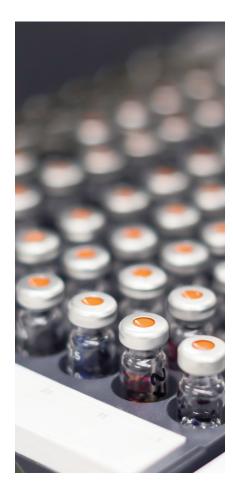

Various types of sampling equipment and collection media can be provided by the lab, including:

- High and low flow air pumps
- Dustfall jars
- Hi-Vol filters
- Sulfation plates
- Absorption tubes
- Wipes and swabs
- Passive badges

SRC Environmental Analytical Laboratories offers tests for:

- Nuisance dust (particulates)
- Formaldehyde
- Metals
- Lead in paint
- Alkaline dusts
- Inorganic acids
- Cyanide
- Volatile Organic Compounds (VOCs)
- Polychlorinated Biphenyl (PCBs)
- Gases (CO, CO<sub>2</sub>, CH<sub>3</sub>, O<sub>2</sub>, N<sub>2</sub>)
- Radionuclides
- Radon in indoor air
- Alpha-Quartz

Contact the lab for sample requirements and pricing.
