

ProGrid

EVALUATION SOLUTIONS

Want to make better decisions? ProGrid Evaluation Solutions™ can help your organization optimize its decision-making matrix and unlock the power of the ProGrid™ methodology.

All ProGrid™ Advisory Services are available to you based on a reasonable hourly or daily rate for specialized consulting services plus direct travel expenses.

ProGrid™ Advisory Services

ProGrid Evaluation Solutions™ representatives are available to assist you with all your decision-making needs.

How it Works

Your ProGrid™ Advisor will work with you to develop a customized decision-making matrix using our proprietary Language Ladder™ process. A core element of the ProGrid methodology is the Language Ladder process, which clarifies and optimizes your decision-making criteria. Your ProGrid Advisor helps you navigate the Language Ladder process and structures a decision-making matrix tailored to your specific needs.

When it's decision time, your ProGrid™ Advisor can remain with you every step of the way. Your ProGrid Advisor can attend your decision meeting or offer other consulting services associated with your decision-making process.

Generic Language Ladder™

ProGrid™ Analytical Services

With your decision-making matrix in place, ProGrid Evaluation Solutions™ representatives can facilitate access to the proprietary ProGrid™ software application best suited to your needs.

ProGrid™ Analytical Services are available on a pay-per-use basis for each option or opportunity being evaluated.

REPORT

DECIDE

RESPOND

How it Works

1. Gather

- Your ProGrid™ Analyst will provide you with a standard set of forms to record critical information on each option or opportunity being considered.

2. Evaluate

- Based on the information gathered, your ProGrid™ Analyst will provide customized evaluation forms for distribution to all members of your decision-making team. These forms allow your team to individually evaluate, record comments and rank each option or opportunity according to your specific decision-making matrix.

3. Report

- Your ProGrid™ Analyst enters the completed evaluation forms into a ProGrid software application to generate a series of reports designed to simplify and accelerate a rigorous decision-making process. Reports are delivered to you electronically within two business days of submitting the completed evaluation forms.

4. Decide

- Your decision-making team uses the ProGrid™ reports and evaluator comments to focus discussion and make the best possible decisions.

5. Respond

- Following your decision, your ProGrid™ Analyst can help you close-the-loop by offering ProGrid reports specifically designed to provide valuable feedback to option or opportunity proponents and other key stakeholders.
